DO YOU HAVE POOR INTERNET SERVICE?

The Town of Ignacio has again partnered with FastTrack Communications in Durango on a State grant that, if awarded, will provide fiber optics to each residence and business in Town. Delivery of fiber optic service will greatly improve broadband internet access for work or school needs within your business or home. Criteria for this grant program requires an applicant to verify that they are unserved by high speed internet. We are asking you to help us verify that the Ignacio area is unserved by completing an internet speed test using the below address. We did ask for this help during the last grant cycle but didn't receive a big turnout. Please help us for this grant submission by completing the test and please tell others to do the same. Thank you.

To conduct a speed test, go to the following link:

https://gis.colorado.gov/speedtest/

Click the "Go" button. If the results of the speed test are below 25 Mbps in download and 3 Mbps in upload (if either number is below the threshold), please fill out the remaining items on the online form and hit "Submit."

The following information is needed if you have it:

- Your address
- Your Internet Service Provider (CenturyLink, AlignTec, Comcast, Verizon)
- Type of services (If you have CenturyLink, you have DSL service. If you are using Verizon, you have cellular data, AlignTec is fixed wireless or WI-FI, and Comcast is cable modem)
- Is the service you are using residential or business? (If this is from your home, click residential).
- What is the internet download speed you are currently paying for (in Mbps)? It's okay if you do not know.
- What is the cost of your internet service (in $/month)? Again, it is okay if you do not know.
- May we share your test information with internet providers? Either yes or no is acceptable.
- Would you like to receive email updates from the Colorado State Broadband Program? Either yes or no is acceptable.

Then, click the "Submit" button.

Thank you for your participation and assistance in the application for this grant!
